# Transitions in ageing An interdisciplinary framework for research

Summer School - 1-5 September 2025

The demographic transition requires new frameworks and knowledge on the complexities of a rapidly aging society. In the School, *transitions* are the cross-cutting topic and unifying framework for interdisciplinary dialogue among experienced researchers, doctoral students, and early career researchers from education and learning, life course sociology, service management, social and critical gerontology, technology, and beyond.

The program alternates lectures, methodological workshops, dialogic sessions, and group work, to facilitate participation and the co-construction of writing.

**Organizing committee:** Laura Formenti (Milano Bicocca), Amelia Compagni (Bocconi), Cristina Mele (Naples “Federico II”), Tiziana Nazio (Turin).

## Invited keynotes:

- Hany Hachem, Department of Computer and Information Science, Linköping University
- Daniel Holman, Department of Sociological Studies, University of Sheffield
- Gunhild Tøndel, Department of Sociology and Political Science, Norwegian University of Science and Technology
- Anna Wanka, Institute for Social Pedagogy and Adult Education, Goethe-Universität Frankfurt
